

Bonded One Piece 5' diameter

Water and Wastewater Tanks

- Lightweight – a fiberglass tank is lightweight, thus easier to ship and easier to install than tanks made of other material
- Corrosion Resistant – will not corrode or break down like other products utilized to hold liquids. This eliminates the possibility of leakage due to either internal or external rusting
- Cost effective storage alternative
- Engineered to withstand 7 Feet of overburden over tank
- Water tanks are approved by NSF Standard 61 (potable water tanks)
- Wastewater tanks are approved by CSA Standard B66
- Available in 5 capacities as a single compartment for Holding and Water Storage or as a two compartment tank for Pump-Out and Syphon

Drinking Water
NSF/ANSI 61

Fiberglass, the tank of choice!
